**FREE FROM PAINFUL TAPE BACKUPS & RELIABILITY ISSUES**

**HIGHLY ACCESSIBLE CLOUD BACKUP**

**RESTORE DATA FASTER**

**SCALABLE; SIZE, FREQUENCY & RETENTION**

**SECURE AT ALL TIMES**

VOCUS BAAS FEATURES	BENEFIT OF EACH FEATURE
Total, out-of-the-box solution	Means no time wasted, no assembly required – point and click, and you're running
Your data and servers are backed up to the Vocus Cloud	So your business is protected against data deletion or corruption, accidental or otherwise
Two options available – both leaders in the Gartner Magic Quadrant for backup and recovery software	Customised solution for your organisations needs: <ul style="list-style-type: none"> <li>• Veeam Cloud Connect (SME/Corporate)</li> <li>• Commvault (Enterprise)</li> </ul>
Restore whole or selectively	Gives you faster speed of restore, minimises your downtime due to any data losses
Vocus BaaS is stored in NZ	Enables a faster restore than offshore options
Multiple historical copies – as far back as you choose	You can roll back to earlier versions of data after changes have been made to live data
Specify how long your data is kept	Customised to your unique needs e.g. end of financial year, legal requirements, with long term data retention available
Stored offsite using Vocus infrastructure	You don't need to worry about infrastructure capex
Is scalable to business needs	You only pay for what you need. Cost effective opex model.
As A Service is a subscription model	You're billed monthly making costs easy to manage
Use existing internet or WAN bandwidth	No need to amend your connectivity or incur additional costs
End to end data encryption is used	Means your backups are secure in flight, over an SSL connection, and at rest in the Vocus Cloud platform with enterprise-grade security
Automated backups and alerting	Scheduled backups free up system administrators with no risk of
More reliable than tape/manual backups	Higher rate of restore success than with tape backups
